Aspiring Software Developer | Python | C++ | C | SQL | Data Structures amp; ...

Just now

As a B.Tech CSIT student at REVA University, I have been working on improving my programming and problem-solving skills. Recently, I have been practicing C++ and solving algorithmic problems on HackerRank, while also working on practical software projects. These experiences have taught me that programming is not just about getting the correct output, but also about writing efficient solutions and understanding time and space complexity. I am continuing to learn Data Structures and Algorithms, backend development, and new technologies, and I look forward to applying these skills in real-world projects and internships. #SoftwareDevelopment #Programming #Cplusplus #DSA #HackerRank #LearningJourney #ComputerScience

Aspiring Software Developer | Python | C++ | C | SQL | Data Structures amp; ...

This is a valuable perspective. I especially agree with the importance of building strong fundamentals before moving toward advanced technologies. As a CS student, I am currently focusing on programming and Data Structures and Algorithms to strengthen my problem-solving skills.
