ACTIVITY 12 - PORTFOLIO BRIEF

Ramappa Kumar Chougala | B.Tech Computer Science and Information Technology (CSIT) | 3rd **Semester**

Name	Ramappa Kumar Chougala
Course	B.Tech Computer Science and Information Technology (CSIT)
Semester	3rd Semester
University	REVA University

About Me

I am a 2nd-year B.Tech Computer Science and Information Technology student at REVA University. I am developing my programming and problem-solving skills through C, C++, Python, SQL, Data Structures and Algorithms, Git and GitHub. I enjoy solving coding problems, building practical software projects, and continuously improving my technical skills through hands-on learning.

My Learning and Projects

Activity 1 - VS Code / Programming Setup

I set up my programming environment using VS Code and practiced writing, compiling, running, and debugging basic C and C++ programs. This helped me become comfortable with the programming workflow and develop a stronger foundation in programming.

Activity 2 - Git and GitHub

I learned the fundamentals of Git and GitHub, including creating repositories, committing changes, pushing code, organizing projects, and maintaining my programming work online. GitHub now serves as my portfolio for demonstrating my coding practice and projects.

Activity 3 - Collaboration

I practiced GitHub-based development and learned the basic concepts involved in collaborative software development, including maintaining repositories, organizing code, and using version-control workflows.

Activity 4 - LeetCode Practice

I created a LeetCode Solutions repository to organize my coding practice by topic. The repository contains solutions covering Arrays, Strings, Two Pointers, and Sliding Window, including problems such as Two Sum, Best Time to Buy and Sell Stock, Valid Anagram, Valid Palindrome, Container With Most Water, 3Sum, Longest Substring Without Repeating Characters, and Permutation in String.

Repository: https://github.com/ramchougala2/leetcode-solutions

Activity 5 - HackerRank Algorithmic Problem Solving

I created a HackerRank 3rd Semester Portfolio to maintain my algorithmic problem-solving solutions. The repository contains solutions for Diagonal Difference, Dynamic Array, Time Conversion, Compare the Triplets, and Sparse Arrays, along with topic classification and time and space complexity analysis.

Repository: https://github.com/ramchougala2/HackerRank-3rdSem-Portfolio

Activity 6 - RAILETA Dynamic Train ETA

I developed RAILETA - Dynamic Train ETA Forecasting System, a project designed to provide real-time train information and dynamic ETA forecasting for Indian Railways. The system includes live train tracking, current speed, delay information, station-wise ETA, route visualization, interactive railway maps, and weather information. The project uses React, TypeScript, Vite, Tailwind CSS, Leaflet, Python, FastAPI and Uvicorn.

Repository: https://github.com/ramchougala2/raileta-dynamic-train-eta

Additional GitHub Work

I have also maintained programming repositories including C programming practice and a graphics editor project, demonstrating continued practice with programming and software development.

GitHub: https://github.com/ramchougala2

Skills

- C
- C++
- Python
- SQL
- Data Structures and Algorithms
- Problem Solving
- Git
- GitHub
- FastAPI
- React
- TypeScript
- Vite
- Pandas
- NumPy
- Machine Learning

Career Goal

My goal is to become a strong software engineer and secure a good software development internship and placement. I want to strengthen my Data Structures and Algorithms, programming, backend development, and project-building skills while gaining practical experience by working on real-world software projects.

ACTIVITY 12 - PROMPT & REFINEMENT LOG

Initial Prompt

Create a one-page personal portfolio for Ramappa Kumar Chougala, a 2nd-year B.Tech Computer Science and Information Technology student at REVA University. Include About Me, Learning and Projects, Skills, Career Goal, GitHub, and Contact sections. Highlight my programming practice, LeetCode and HackerRank work, and software projects.

Refinement 1

Add my GitHub profile and use my actual GitHub username ramchougala2. Include direct links to my repositories and make the portfolio content consistent with my GitHub projects.

Refinement 2

Add my LeetCode Solutions repository and summarize the topics and problems covered, including Arrays, Strings, Two Pointers, Sliding Window, Two Sum, Valid Anagram, Valid Palindrome, 3Sum, and other completed problems.

Refinement 3

Add my HackerRank 3rd Sem Portfolio with the five completed problems: Diagonal Difference, Dynamic Array, Time Conversion, Compare the Triplets, and Sparse Arrays, including complexity analysis.

Refinement 4

Add my RAILETA - Dynamic Train ETA Forecasting System project with its GitHub repository link and technology stack, including React, TypeScript, Vite, Leaflet, Python, FastAPI, and Uvicorn.

GitHub Portfolio
